

PRESS RELEASE

Lumens Announces New VC-A52S HDMI PTZ Video Camera

Full HD Performance With an Outstanding Value

Hsinchu, Taiwan, March 24th, 2020 – Lumens® Digital Optics Inc., the global leader in the ProAV market, today introduced the VC-A52S PTZ video camera, an upgrade from the previous model VC-A51S. It is equipped with a professional 1/2.8 inch image sensor with Full HD 1080p output resolution. The VC-A52S offers a crystal-clear image with a superior 20x optical zoom lens. The camera can adjust the lighting level in a room from extreme brightness and to darkness.

The VC-A52S offers HDMI and 3G-SDI interfaces, which are the most common output interfaces in the industry. 3G-SDI enables a 1080p video signal to run over a long-distance with no latency. Furthermore, it allows a wide shooting area and a quiet, fast and smooth positioning movement, ensuring an unbeatable video experience.

The VC-A52S PTZ video camera offers unbeatable image quality and can apply to different markets easily without having to deal with additional technical interferences or bringing on additional staff to manage the video equipment. The camera is applicable for broadcasting, medical, events and other environments.

Pricing and Availability

The VC-A52S PTZ video camera is available now. Color option: Black, White.
